About This Guide	ix
Introduction	xi
The history of tables & reporting	
Why we use Report Writing software	
What makes R&R my choice	
Chapter 1 -- The Basics of Reporting	1
Definitions & diagrams for important reporting terms	
Report types R&R will not do	
Breaking down a printed report into its "bands"	
Identifying the base unit of a report: the "item"	
Chapter 2 -- R&R Primer	17
Recognizing each piece of the R&R program window	
Don't ForgeDOS #1: The MS-DOS program screen	
The program window's work area and grid	
How the R&R report layout produces the printed report	
The Record Band and the printed report	
Chapter 3 -- Building the Perfect Beast	37
Introduction of sample table Set A	
Exercise Box #1: Building a report sketch	
The R&R Report "Wizards", sort of	
Using defaults to set margins for a new report	
Adding band lines and placing label and field items	
Selecting items to modify the report layout	
Centering and positioning items in the layout	
The Record Band and the data table	
Defining a total field	

Chapter 4 -- Save Me

73

Using report libraries
Saving report formats to, and retrieving them from, libraries
Using one report as a head-start for another: Templates
Editing a label item's contents
Manipulating items in the report layout
Double-spacing the report's body

Chapter 5 -- Know Your Purpose

93

How to begin the reporting process with a clear direction
The 3 categories of report purposes & recommendations
Exercise Box #2: Translating a stated purpose' category
Introduction of sample table Set B
Limiting the records R&R will include: the Query
Breaking the query into its component parts
The Query tests and how they work
Expanding the Query with logical AND / OR
Using logical parentheses in the Query
Exercise Box #3: Practice your Query statements
Don't ForgeDOS #2: Defining the Query

Chapter 6 -- Sorting Things Out

123

Defining the Sort specification
How R&R sorts the records in the table
Exercise Box #4: Practice your Sort specifications
Shortening a character field item to make room
How the Sort and Query work together
Grouping: It just keeps piling up!
Why the Sort and Group specifications must work together
Using Group Header & Group Footer band lines
Breaking the report into sections with group bands
Defining and using group-level totals
Exercise Box #5: Practice your Grouping specifications

Page No.

Chapter 7 -- Pull Out Your Calculators

165

Calculated Fields and how they work
The four data types: character, numeric, date, logical
Why and how data types are important for reporting
Changing the presentation of field items of each type
Deriving new fields: creating a Calculated Fields
Calculation involving date type fields
Special R&R calculation functions

Chapter 8 -- Joining the Party

217

Printing options & previewing the report
Setting the print margins and other print specs
Portrait vs. Landscape reports
Don't ForgeDOS #3: Printing in R&R for MS-DOS
Introduction of sample tables Set C
Defining a link or relation between tables
Different methods of joining one table to another
Understanding data table indexes and their importance

Chapter 9 -- For Those Trying This At Home

265

The Report Writing Guide^o
Doing it yourself
Using page breaks within the report format
Creating a report sketch for your own reports
Cooking with R&R

Contents

	Page No.
Appendix A -- R&R Calculation Functions	289
Description of important R&R functions	
Examples of how to apply common R&R functions	
Appendix B -- Composite Database Shapes	315
Descriptions and diagrams for the four database shapes	
Definitions and use of different table categories	
Recognizing your Entity, Event and Reference tables types	
Exercise Answers	331
Replies & explanations for the Exercises Boxes	
Glossary	339
Definitions for reporting and database terms	
Hint Index	351
Page locations and titles for expert suggestions	
Subject Index	355
